Your System Works. Keep It That Way — Without Thinking About It.

The Aqua Pro care plan on one page: what it covers, what it costs, and the honest comparison.

I'm Matt. I just installed your system, or I just tested your water at your tap. Either way, here's the part nobody tells you up front: a softener only keeps working if the salt stays filled and the filters get changed on time. Miss that, and the water slowly goes back to what it was.

That's what this plan is for. You never think about it again. I do.

What you get for $39 a month

- Salt kept filled. I check it and top it off on my route. No hauling 40-pound bags from the store, no lifting them into the tank, no running empty without knowing it.
- Filters changed on schedule. Your sediment filters get swapped when they're due — not six months after, when you finally remember.
- Annual water test at your tap. Once a year I test your water right at your kitchen tap and tell you straight what it says. If something's drifting, we catch it early.
- Priority scheduling. If you need me, plan customers go to the front of my list. You call, you get moved up.

What it costs — and the honest comparison

The plan is $39 a month.

If you do it yourself, the salt alone runs about $114 a year in bags. That's cheaper on paper. It's also you driving to get them, hauling them home, and remembering the filters and the test on your own. Most people don't. That's not a knock — it's just how it goes.

The big national dealers charge $70 to $100 a month for plans like this. Some charge $20 to $40 a month just to drop salt at your door — no filters, no test, nobody who knows your system.

$39 sits in the middle on purpose. Fair local price, everything above included, done by the guy who put your system in.

What's not covered

Repairs, parts, and new equipment aren't included. If something breaks, I'll tell you what it costs before I fix it. No surprises, nothing buried.

How to start

Call or text me at (727) 342-0091 and say you want the care plan. I'll get you set up and put you on the route.

Aqua Pro Services · Clearwater, FL · Serving Tampa Bay. I'm Matt — I do the installs myself, and I answer my own phone.
